Continental Divide Knives

About John Toner

John E. Toner began making knives as a hobby in 1989. Soon friends were asking him to make one for them or as a gift for someone else. Before long, the hobby became full time work.

Most of John's works now attract collectors from all over the world. This work includes Stainless Damascus and ATS34 High Carbon Stainless Steel blades. The handles range from simple elk antler to high quality gemstone and ivory.

He also makes a lot of knives for hunters and fishermen. His personal designs are the Ultimate Skinner, which is a 2 way blade used for gutting and skinning and a 2 piece pack set, also for hunters.

His steak knife sets are unique and can be ordered with the quantity of knives you want and carving pieces to match. They come with a unique burl wood holder to display the knives.

John will be happy to discuss personal designs with you and create a unique design for you.

John is a member of the Knifemakers' Guild.
